## CONTACT

**Phone:** 0964928333

**Email:** minhluan032005@gmail.com

## SUMMARY

Motivated third-year IT student with a strong interest in applying data and technology to the gaming industry. I am passionate about data-driven decision-making, player behavior analysis, and using insights to improve game design, user engagement, and monetization strategies. With a curious and adaptable mindset, I enjoy solving real-world problems through structured thinking and creative solutions. I bring enthusiasm, responsibility, and a commitment to continuous learning in collaborative, fast-paced environments.

## SKILLS

- **Programming:** SQL, Python, HTML, C/C++
- **Data Tools:** MS SQL, IBM Infosphere, **Excel**, **Power BI (currently learning)**
- **Communication & Collaboration:** Proficient in English (both written and spoken), comfortable working in team environments
- **Technology Fluency:** Comfortable with tools & platforms; quick to learn new systems
- **Strengths:** Self-learning, problem-solving, responsible, detail-oriented, eager to learn and open to feedback

## WORK EXPERIENCE

### FSS – Financial Software Solutions

Data Engineering Intern

- Learn to use data query, extracting tools
- Developed knowledge of ETL workflows and data security considerations
- Gained foundational knowledge of financial and banking operations
- Creating data pipelines to collect, clean, and transform raw data (SQL Oracle) from various sources
- Supported data extraction and reporting
- Gained exposure to a professional and structured work environment

## PROJECTS

### Pizza Sales Data Visualization

Link to project: [MinhTuan0305/Pizza-Data-Queries-and-Analyze](#)

**Tools:** MS SQL, Excel

- Collected and queried data using SQL
- Cleaned and visualized data in Excel to highlight key trends and performance metrics.
- Assisted users in tracking sales and revenue to develop more effective selling strategies.

### Travel Destination Research Tracker

Link to project: [Web Scrapping for Destination Data](#) , [Airtable File](#)

**Tools:** Python, Airtable, Excel

- **Web Scraped** travel destination information from a tourism website using Python
- Helped users easily compare and choose travel destinations based on type and season

## EDUCATION

### National Economics University (NEU) | 2023–2027

Information Technology & Data Transformation

- Third-year Student
- GPA: 3.4

## CERTIFICATES

### IELTS

Band 7.0

### Prom The Starry Night

Extracurricular club activities
